# Elevation Profile

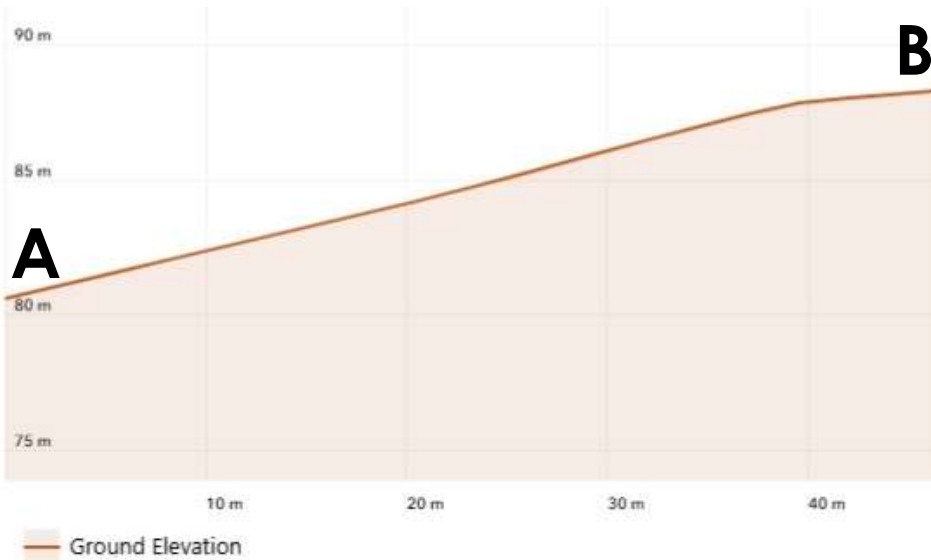

## Map

Note: The only way to get accurate and reliable data regarding the slope of a site is to have a professional Land Surveyor do a detailed site survey. The information in this document is an approximation based on data available through various online databases.

The map alongside shows a cut line taken from the highest corner of the site to the lowest corner.

## Elevation Profile

The figure alongside shows the approximate elevation of the site as if it were cut along the above line. It therefore approximates the highest and lowest points along with the slope between them.

## Statistics

### Ground Elevation

AVG Elevation	AVG Negative Slope	AVG Positive Slope	Elevation Gain
84.67 m	No value	9.74 °	7.7 m
Elevation Loss	MAX Distance	MAX Elevation	MAX Negative Slope
0 m	46.7 m	88.31 m	No value
MAX Positive Slope	MIN Elevation		
10.6 °	80.62 m		

The data alongside shows approximate information related to the elevation of the site. Elevation values are based on height above sea level.
